

TABLE OF CONTENTS (DRAFT)

DATABASES

Using Clarion's Business Rules	1
What is a business rule?	2
How do the business rules work?	2
An Example	2
Multi DLL	6
Changing rules at runtime	6
Global Declarations	6
Embedded code	6
Methods	8
Queues	10
Implement the template	13
Disadvantages	15
Advantages	15
Summary	15
Source code	15
Using Client-Side Triggers In Clarion 6	17
The sample app	17
Trigger code	19
Extending the FileManager Class: Shorthand Fetches	21
MyFile.inc	22
MyFile.clw	24

Using Arrays in Databases	27
Indexing browse-displayed fields	28
Storing arrays	31
Protecting yourself from errors	32
Initializing the database	32
More complex OVERs (not for the faint-hearted)	33
Conclusion	34
Generating MS SQL Server Side Triggers	35
What are Triggers?	36
The Template	37
Running the script	41
How it works	44
Summary	47
SQL Identity: Another Approach	49
Creating the sysIDs	50
The stored procedure call	51
The jgNextID Stored Procedure	51
Management stored procedure	52
Extension Template	53
Summary	54
Migrate Your Topspeed Application To Firebird	55
Some Firebird Information/Links	57
Connection Information	58
Step 1: Generate Topspeed Table Structures	58
Step 2: Creating The Firebird Scripts	60
Boolean values	61
Must be in Numeric Range	62
Must be in List	62
Utility Options And Prompts	62
Date and Time	65
Memo and Blob	65
Strings, Cstrings and Pstrings	66
Auto numbering	66
The Scripts	66
Relational integrity constraints	68

Step 3: Dictionary change - modify A TXD	68
Utility options and prompts	68
Step 4: Create conversion files for TopSpeed to Firebird	70
Conversion information	70
Conversion option 1: Data DLL	71
Conversion option 2: Dictionary table names	72
Utility options and prompts	73
Requirements	75
Summary	75
Date Filtering with MSSQL.....	77
The WHERE clause	77
Date EQUATEs	78
NAME() Becomes Irrelevant.....	81
Introducing PROP:DataPath	87
Summary	88
Dynamic Table-Based Tagging.....	89
Manipulating the tags	91
Putting it together	92
WhoAmI procedure	92
BrowseMembers procedure	92
Complex filtering	94
Dynamic Global Tags	94
BrowseStates procedure	95
It works better in SQL	100
But I wanted to do it differently!	101
Stay tuned for the next exciting episode	101
Converting TPS Files To A New Layout.....	103
The original version	105
Coding version 2	108
The conversion program	111
Summary	117

Handling Nullable Fields in an ABC Application	119
User Options	120
Null GUIDs and foreign keys	121
The template	122
Querying SQL Data	125
Prerequisites	125
The class	126
Close the data set	128
Conclusion	129

TEMPLATES

Introducing Code Templates	133
The CloseCurrentWindow code template	134
The InitiateThread code template	136
Generating the code	139
Writing Code Templates	141
The source code	141
Making sure the code works	143
Designing the template	144
The EasyMessage template	144
Creating a new chain	145
The simplest EasyMessage template	147
Summary	150
Source code	150
Enhancing Code Templates	151
The template	151
Adding documentation	152
Adding optional prompts	154
Adding an icon pick list	154
Adding button choices	156
The brute force method	158
Source code	160

Using #GROUPs	161
Applying #GROUPs	164
The complete template	168
But is it better?	170
Source code	171
Template Styles in Clarion 6	173
An example, please	175
Backward compatibility	176
Fix one problem, create another	178
Summary	179
A C6 Tagging Class Template Wrapper.....	181
Changing the tagging class	181
Creating the template	182
Testing the template	183
Modifying The Frame Background - A 10 Minute Template.....	189
Coloring the frame background	189
Template requirements	191
Where to start?	191
Adding the Window Designer	192
Tidying up the window	193
Replacing the window	194
Including the API declaration	197
#PROMPTs for the template	198
Implementing the template	199
Final Example	201
Addendum	201
Conclusion	201
Speeding Development With Defaults And Small Templates.....	203
Defaults file	204
Progress window	204
Report	205
Templates using ProcedureDescription	206
Report Extension and Year Include Files	207
Window extension	209

Internationalization	210
Conclusion	210
How To Stop Trashing The Template Registry	211
How it works	213
Data	215
Source code	218
THREADING	
Implementing a Critical Section: Fast and Effective	221
But first, a word from our sponsor	221
A Critical Section in Four Lines of Code	223
Watch Out!	224
Source code	224
A Naive Look at The Mutex	225
A Ray of Sunshine	225
The Appeal of the Mutex	227
Mutexing	228
Uses for Mutexes	230
Summary	232
Source code	232
Mutexes: Serializing File Access	233
Why?	235
Implementing mutexes to restrict file access	236
Summary	238
Source code	238
A Naive Look At Pre-Emption.....	239
The trouble with threads	240
Newspeak, again	241
A Case for the Defense	243

Critical Procedures: Synchronization for the Lazy.....	245
Enter the Critical Procedure	246
Implementing a Critical Procedure	248
The Example Programs	249
Source code	250
Converting Clarion 5.5 Apps To Clarion 6.1	251
Threading issues	252
The Global Cooperative Threading Extension	252
Converting the app	253
Modifying the template	255
Porting to the C6 Threading Model: The AutoLog Example.....	257
Threading issues	257
Port to C6 using C55	259
How to Port to C6	259
Passing Data to New Threads	261
Sharing data between procedures	265
C6 Adds BINDEXPRESSION	267
Summary	271
Source code	271
Tackling Global Queues in Clarion 6	273
General Access Functions	276
Summary	280
QueueManagerClass Reference	281
Source code	286
A Multi-Threaded Queue Of Queues	287
Data Declarations	287
Inner Queue Creation and access	288
UsingThreads.	289
Inner queue locking	290

BROWSES, FORMS AND REPORTS

A Tree in a Page Loaded Browse: the Sequel	295
Up and down	296
Using a tree file	297
Inserts	303
The source code	307
Cutting and pasting	315
A FileDropBox With Conditional Content	323
Setting up the FileDropBox	323
Refreshing the FileDropBox	324
A FileDropBox with a different source (file)	326
Summary	329
Handling Windows With Hundreds Of Controls	331
Creating the window	332
Local procedures	333
A queue of field equates	333
The floating FileDropBox	334
Entering and validating data	334
Getting the FileDropBox right	335
The 50 lookup-buttons	337
Dynamically created buttons	338
Summary	339
Addendum	339
Reports: OOP, ABC and Ignoring Templates	341
Setting PROP:PageAfter	341
The problem	342
The solution	343
A Better DosFileLookup.....	347
Derived class or modified template?	348
cciSelectFileClass requirements	348
Using cciSelectFileClass	353
Summary	357

Clarion Apps Can Be Sexy!	359
The application frame	360
The browse	361
The form	363
Wizards	364
Reports	364
Summary	365
Links	365
Embedding Fonts In Clarion Apps.....	367
API calls	368
FindResource() LoadResource()	368
AddFontMemResourceEx()	369
SizeOfResource()	369
HAND/APP code placement	370
Create the LIB file	371
PROJECT File tweaks	371
Adding a font file	371
Compile & Test	373
Create the Resource DLL	373
DLL Project File	374
Create the DLL EXP file	374
Additional API calls	375
EDIT Project File	376
Compile and Test	377
Project Source code	378

CLARION AND .NET

.NET Basics: What Is .NET, And Why Should I Care?	381
What is .NET?	382
The good old days	382
The Windows API	383
The not-so-wonderful world of COM	383
Microsoft sees the Sun	384
Differences	385
Similarities	385

Namespaces	386
What it all means	387
.NET Basics: What Is .NET, And Why Should I Care? Part 2	389
Namespaces	389
Namespace hierarchies	390
The .NET framework namespaces	391
Which version of .NET do I want?	396
Why should I care?	397
Beyond the .NET framework	400
Mixing Clarion with .NET, Part 1	401
.NET Versions	402
Overview	403
A simple Active-X wrapper	403
Make a .NET assembly into a COM component	405
Make the support files	408
Test with something simple	409
Now return something	409
Wrapup	410
Mixing Clarion with .NET, Part 2	411
Microsoft marketing decisions	412
Create the Active-X control	413
Explicit GUID	414
Add the control to Clarion	415
Get rid of cut-and-paste	416
Adding a form to a Clarion project	417
Handling other events	418
Okay, now what can I do?	419
Flexible forms	419
Wrapup	420
Mixing Clarion with .NET, Part 3	421
Calling convention	422
Plug into .NET	423
Invoke this method	424
Calling the procedure	425

Overloaded procedures	425
Passing parameters	426
Mixing Clarion With .NET, Part 4	429
String parameters	429
Dates and times	431
Times	433
Decimals	434
Mixing Clarion With .NET, Part 5	437
Lay out the struct	438
Nix the GROUP	439
The .NET Side	440
Wrapper Procedures	441
One-Way Groups	441
Passing Groups to .NET	442
Do you really need the group	442
Wrapup	442
Mixing Clarion With .NET, Part 6	443
Making a COM wrapper	444
Native C++ Wrapper	447
Test Program	447
Making life easier	448
Gotchas	449
OK, let's do something fun	449
Conclusion	452

WINDOWS API

Memory Mapped Files in Clarion.....	455
Weighing my options	455
Implementing the Memory Mapped Files	456
OpenFileMapping	457
CreateFileMapping	458
MapViewOfFile	460
Reading the Mapped File	461

Writing to the Mapped File	462
FlushViewOfFile	462
UnmapViewOfFile	463
Summary	464
Modifying the Common Dialogs: How Hard Could It Be?	467
GetOpenFilename	467
Filling DlgTemplateEx	469
Creating a control	470
Testing the code	472
Handling button clicks	474
Cryptography and Clarion: Using the MSCrypto API.....	477
What is Cryptography?	478
Encryption	479
Symmetric or Private Key Encryption	479
Asymmetric or Public Key Encryption	480
Asymmetric Encryption Gotcha!	481
Encryption Strength	482
Block and Stream Encryption Algorithms	482
The Microsoft CryptoAPI	482
The Clarion CryptoCL Class	487
Properties	488
Methods	490
Hello, Server?	501
IsDestinationUnreachable	502
Restrictions	503
Testing	504
Using GetLastError and FormatMessage to Check the Network.....	509
GetLastError	512
FormatMessage	513
The Parameters	514
Summary	517

IsNetworkAlive: When You Don't Need to Know That Much.....	519
IsDestinationReachable, the Practical Side	519
IsNetworkAlive to the Rescue?	522
The Technicalities	523
Caveats	525
Summary	525
Translating Mapped Drives To UNC	527
GetDriveType	527
WNetGetConnection	530
Summary	531
Fetching A Web Page With WinInet.....	533
The WININET DLL	534
The WebFetch DLL	534
Using the WebFetch DLL	536

MISCELLANEOUS

Exporting APPs and DCTs to XML.....	541
Why XML?	541
Exporting the dictionary	542
Exporting the APP	549
Reference variables in templates	552
Compiling C with the Clarion IDE: It's Easier Than You Think	555
Compiling C in Clarion	557
Prototyping C Functions in Clarion Code	559
Including C Modules into the Compile Stream	562
What is RC4?	563
Compiling the AES Algorithm	564
The MD5 Algorithm	565
Compiling MD5 and String.h	565
Making the MD5.H Clarion Include File	566
Testing MD5 and String.H Redux	567
Name mangling	569
Clarion and C++ Mangle the Same	570

Clarion C for Calling the Windows API	573
Compiling and Calling C Summary	574
Further Reading:	575
The Shortest Useful Clarion Program.....	577
Creating a PRJ version	579
Examples	580
Online Mapping And Routing In Clarion	581
Using MSN Maps	582
JourneyMapper	583
Displaying routes	584
Limit An App To A Single Instance: DDE Strikes Back	589
Limiting with DDE	589
Microsoft has its say	591
Allowing multiple instances, with control	592
Validating Credit Card Numbers	595
The Objectives	595
The Algorithm	596
The Clarion Translation	597
Using the function	603
Source code	604
Generating A Unique Registration Code.....	605
The registration code generator	605
The registration code validator	608
Summary	610
Using Local Classes Instead Of Local Routines	611
Defining the class	613
Creating the procedures	614
A simple example	615
A more involved example	617
Using the template	619

Easier Version Control: Using TortoiseSVN With Subversion.....625

Version control is a better backup system	627
Getting started	627
Excluding files and folders	628
Preparing your project	629
Connecting to and browsing the repository	629
Creating your project's folders	630
Importing your project into the repository	632
Time to checkout	633
Commit me, please	635
Resources	636

Putting Clarion 6 Under Version Control With TortoiseSVN637

Getting started	638
Installation	638
Creating a local repository	638
Using TortoiseSVN	639
Selecting a repository	640
Importing the initial version	642
Viewing changes	652
Comparing revisions	652
Other issues	652
Summary	653
Resources	653
