

TIPS VOL 4 TABLE OF CONTENTS (DRAFT)

Internationalization Tools Standards: Learning from an ABC Calendar Workaround.....	3
ABC Calendar Class	5
Multi-language class workaround	7
Applying the multi-language ABC calendar	9
Translation file (PDABCCal.trn)	9
User interface file (ABUtilui.clw)	10
Sample application	10
Preferences	11
The AddLanguage procedure	12
DateForm	13
Conclusion	15
Completely Dynamic Listbox Formatting?	17
Selection criteria	18
Sort options	19
The multi-tabbed browse	21
Multiple format strings	25
Summary	27
Edit-In-Place: Getting User Confirmation	29
Those clever users	30
Asking the user	31
The embeds	33
TakeEvent	35
An alternate approach	36
Conclusion	37
Updating Hot Fields	39
Trials and errors	42
Record Not Available and browse architecture	43
Planting palm firmly on forehead	43

One solution	44
Summary	46
Aesthetically Pleasing Recursive Updates.....	47
Recursive updates	48
Recursive Inserts	51
SELF.BatchProcessing	53
Summary	53
Beautifying Clarion Applications.....	55
Highlighting prompts and lists	56
Redrawing controls	58
The DrawGlassPanel procedure	59
Drawing the line(s)	60
Dropping a shadow	61
Getting a head(er)	61
Adding to your body count	63
The end of the line	63
Make up	65
The template	65
Conclusion	66
Replicating IDLE: Throwing Users Out.....	67
But Wait!	68
TakeEvent	69
Doing the dirty	70
Who Did What?	71
Summary	72
Throwing Users Out: Methods of Computation	73
But first, the assumptions	74
And now, another assumption	74
Time of day	75
Countdown	76
Count up	78
But wait! There's more!	78

Recursive Adds.....	81
The default option	83
Buttons on the browse	84
Under the bonnet	85
And now, back to our show	86
Buttons on the form	88
Summary	90
A Survey Of Embed Usage	91
A storage problem	92
The schema	92
Parsing TXAs	94
Procedure types	94
The embeds	99
Event embeds	105
WindowManager method embeds	106
Browse embeds	110
Process/Report embeds	112
Embeds by procedure type	112
Conclusions and recommendations	125
Another Single Browse For Multiple Lookups	129
The browse code	130
The extension template	132
Features to be added	139
Summary	139
An Economical Record Status Control	141
The template	143
Features to be added	147
Using the template	147
Summary	147
A Template Debugger	149
The Ingredients	150
Adding ODS Messages to Templates	151
Conclusion	152

A Class Wrapper for the SimpleOCR API.....	155
SimpleOCR	156
Class wrapper	156
Callbacks	158
Character recognition	159
Improving On The Non-Related Lookup Template	163
Using the stock template	163
Adding functionality	165
The code template	166
Summary	169
Global Variables, Threads, Critical interSections and the Dangers of Un-protected Sets.....	173
Common misconceptions	174
From bad to worse	176
Practicing safe sets	178
There's gotta be a better way	183
Acknowledgements, thus far	183
A Global Variables Protection Class	185
SetGlobal method	186
GetGlobal method	188
Testing	189
A Template wrapper	196
Putting it all together	198
Acknowledgements	198
Classes For Background Processes	201
A background procedure	202
Almost STARTing a class	203
The example	204
Constructors, destructors, and GPFs	207
Thread safety	209
Summary	209

When START Starts	211
Controlling START	211
Resume	213
Summary	214
Using DOS Files To Send Printer Codes.....	219
The lowly DOS file	220
Sending commands	221
USB printers	222
Summary	222
Printing A Tree From A Page Loaded Browse.....	223
A dialogue tree	224
The tree design	225
Printing the tree	227
Getting started on coding	228
Adding the content	234
Printing Unknown Queue Fields.....	239
Who()?, What()?	240
Printing a “No Records” Report	243
Step 1: Add the detail band	243
Step 2: Set the band filter	244
Step 3: Open the report	245
Step 4: Modify AbReport.Inc	246
Step 5: Set OpenReport’s result to 0	247
Step 6: Set SELF.Response	247
Other considerations	247
Step 7	248
Summary	248
Writing To A Printer Port: Sending Escape Codes	249
Forward to the past	252
CreateFile	253
WriteFile	255
CloseHandle	256

The Sample App	256
Summary	257
Print Directly to Printer Made Easier	259
A single call	260
The source procedure	261
The Easiest Way To Write To A Printer Port.....	263
The Nova Templates	263
Winevent	265
Summary	266
Direct-To-USB Printing.....	267
USB need not apply	268
DEVCON to the rescue	269
Caveats	271
Summary	271
Whitemarsh's Use Of Mimer With Clarion.....	275
Getting Mimer	275
Clarion & Mimer	276
Using the SQL Advanced Tab	279
MS SQL Server and Sample Database	282
What properties?	282
Regular Totaling - retiring ResetFromView	282
PROP:Name	284
PROP:GROUPBY	285
PROP:HAVING	285
SQL() and PROP:ORDER	286
Why not just use PROP:SQL then?	286
PROP:WHERE	287
Summary	288
Creating SQL From XML With XSLT.....	289
An XML template language	290
Transformation	290
Tools	290

Where to start?	292
What about Clarion?	299
Calling XSLT Code From Clarion	301
Transforming the easy way	304
Creating an OLE object in C#	304
Finally, Clarion!	308
Where to next?	312
Resources:	312
External Business Rules with the In-Memory Driver.....	315
The basics of business rules	316
Code changes to the template	323
Summary	328
Using SQLIdentity in Clarion 6	329
The problem	330
Getting the primary key value	330
Summary	335
Multi-User Primary Keys: A Solution	337
A solution	338
Step 1 ñ Create the PrimaryKeys table	340
Step 2 - Create two stored procedures	340
Step 3 - Add starting values	341
Step 4 - Create a Clarion source procedure	341
Step 5 - Remove autoinc	343
Step 6. Remove IDENTITY	343
Step 7 ñ Add the extension template	343
Embedding The SQLite Engine In Clarion Applications.....	345
What SQLite is and is not	346
Topspeed/SQLite performance comparisons	346
So, will you ever get to use it?	348
SQLite class quick start	349
Inside the supplied SQLite Class	351
Conclusion	354

PROP:SQL And Embedded Single Quotes	357
The problem with QUOTE	357
The example app	360
Summary	361
Encryption and Application Signing.....	365
What is a digital certificate?	366
Who is it?	367
Who vouches for that?	368
What is the entity's encryption code?	369
Symmetric encryption	369
Upside and Downside of Symmetric Encryption	371
Asymmetric Encryption	371
Encryption	372
Signing	373
Combining Public/Private Keys with Symmetric Keys	375
Next time	376
Signing Your Applications.....	377
Your digital certificate	377
The Signing Software	379
Signing your code using the wizard	380
Verifying the Signature	385
Signing your code by batch file	386
Creating the Batch file	387
Conclusion	388
Additional Reading	389
Signing Your Applications: New Challenges.....	391
A little background	392
Turning it off manually	393
Turning it off with code	396
Turning it off granularly	396
All users?	398
An end run - my application only	398
For SetupBuilder users	401
As for "real" networks...	401
Miscellaneous security annoyances	402

Conclusion	404
Additional Reading	404
Source code	405
Manifests for Hand Coded Apps	407
Manifest destiny	408
From the editor	411
Source code	412
Get Ahead Of Your Competition With Vista And Office 2007.....	413
Rose colored glasses	414
Ok, wise guy...	414
A not-so-short Clarion bedtime story	415
Payday	416
The good part?	417
The point	417
Rub your hands together	417
The bigger picture	418
Vista-Compliant INI Files.....	419
INI folders	420
The VistaINIClass	420
The template	423
Viewing CSIDL values	424
Summary	424
Source code	424
Running C6 on Vista	425
Fixing clipped text	425
Fixing WinHlp32.exe	426
An Introduction to CVS and WinCVS.....	429
What is CVS?	430
Installing WinCVS	432
Installing Python	432
Terminology	432
Running WinCVS for the first time	433
Start with Checkout	438

Commit changed files	440
CVS, WinCVS and Clarion.....	443
Filters	443
Change logs	445
File status	447
Revision graphs	448
Version numbers	450
Tips	450
Summary	451
Recommended reading:	452
Version Control with CVS and Clarion 6.x.....	453
The software	454
SoftVelocity versions and hotfixes	455
Tagging a product release (version)	460
Modules	461
Release	463
Branching Out	464
Bug FIX!	467
Version Control with CVS and Clarion 6.x, Part 2.....	471
CVSNT Install on Red Hat Fedora Core 3	472
WinCVS install and configuration	473
Configure applications and directories	474
Directory Structure	481
Reasons to use WinCVS rather than Clarion	484
Administration, automatisaton	485
Tools, ideas	486
Source code	487
Understanding The Clarion 6 Version Control Interface.....	489
The Clarion 6 Version Control System	490
The in and outs of Clarion 6's VCS system	491
Details of operation	494
Exporting module TXAs	498
Summary	498

Using MS Visual Source Safe With Clarion	501
Installation	502
Setup	502
Adding files	504
Sharing code	505
Checking out code	507
Getting the latest version	509
Summary	511
Eliminating Circular DLL Calls	515
Getting started	516
Automating the evaluation process	518
Trying to find an optimum ordering	518
Modifying the program	520
Summary	523
Nifty Window Tricks And Smart DLL Loading	525
Getting started	526
Layered windows	526
"Look, there's a hole in my window"	532
Wrapping it up	534
DLLs and Reusable Code: Divide and Simplify	535
Handcoding the DLL	537
Create a folder	537
Create a .PRJ File	537
Create the .CLW file(s)	539
Create an .EXP file	539
Compiling your DLL	540
Sharing the DLL prototypes	541
Making your DLL available	541
Using your DLL	541
Source code	543
Generic DLLs The Template Way	545
Back to the future	545
Export file embed points	546

Hand Coding Export Files	549
Understanding the nuts and bolts	550
Calculating the export list items	551
Don't forget the basics	552
Privacy policy	552
When things go wrong	553
Summary	553
Resources	553
Encrypting Data With Number Base Conversion	557
How to do a general base conversion.	558
Checksums	562
Conclusion	563
App Shutdown Options in Clarion 6.2	565
Using the templates	565
The system tray	568
Clean closedown	569
Summary	571
Accessing Private Class Data	573
No source change required	574
Project defines	575
The Five Minute Developer: Sorting QUEUES	577
The SORT function	577
Customized sorting	578
The Five Minute Developer: Displaying QUEUES	581
The FROM attribute	581
PROP:FORMAT	582
PROPLIST	583
Inter-Date Computations	585
Date arithmetic	585
Midnight rollover	586
StarDates	588

Summary	589
A Better DATE Function.....	591
The DateFixed2 procedure	591
Next Month Anniversary Date Function	593
The nmDate function	594
Getting the end of next month	594
Adding Arrays To Generic Queues With HOWMANY.....	597
Enough is enough!	598
Extending GroupToINI	599
Summary	600
A Customized Deep Assign Function	603
Rolling my own deep assign	604
Step 1: Design the data	604
Step 2: Find the Matching Pairs	605
Step 3: Debug the program	606
Step 4: Finalize and test	607
Converting to a class and include file.	608
Solving Problems With Finite State Machines	609
An example	610
The Character I/O Class (CharFileIO)	611
The Parsing Function (GetToken)	612
The Finite State Machine	613
